## **Q91. Which of the following is the most appropriate example of the utilizing artificial intelligence?**

- a) A system controls the acceleration, steering, and braking of an automobile without intervention by the driver.
- b) A person can check occupancy for a conference room or toilet in real time from his or her desk in an office.
- c) Approval for a transaction is granted through distributed consensus building technology without the need for a central administrator, such as a bank.
- d) A person enters information in advance from a PC at his or her house in order to perform a money transfer automatically without going to the bank.

## **Q91. Which of the following is the most appropriate example of the utilizing artificial intelligence?**

- a) A system controls the acceleration, steering, and braking of an automobile without intervention by the driver.
- b) A person can check occupancy for a conference room or toilet in real time from his or her desk in an office.
- c) Approval for a transaction is granted through distributed consensus building technology without the need for a central administrator, such as a bank.
- d) A person enters information in advance from a PC at his or her house in order to perform a money transfer automatically without going to the bank.

## Q91. Which of the following is the most appropriate example of the utilizing artificial intelligence?

- a) This describes autonomous driving, which uses AI technologies such as computer vision, sensor fusion, and machine learning to make driving decisions without human input. This is the most direct example of artificial intelligence being applied.
- b) Checking occupancy in real time could be done with simple sensors and IoT – not necessarily AI.
- c) Distributed consensus (like blockchain) is more related to cryptography and distributed systems, not AI.
- d) Pre-scheduled automatic transactions are a form of automation, but they do not involve AI – they simply execute a predefined instruction.

**Q92. Crowdfunding can be classified into loan-based, donation-based, purchase-based, or investment-based types, depending on the differences in the form of funding and the way the compensation is received. In order to start a new business, Company A has decided to raise funds through crowdfunding and pay a part of the profits to the funders as dividends. Which of the following is the most appropriate type of crowdfunding used by Company A?**

- a) Loan-based crowdfunding
- b) Donation-based crowdfunding
- c) Purchase-based crowdfunding
- d) Investment-based crowdfunding

Q92 Company A has decided to raise funds through crowdfunding and **pay a part of the profits to the funders as dividends**. Which of the following is the most appropriate type of crowdfunding used by Company A?

- a) Loan-based crowdfunding: Funders lend money and are repaid with interest.
- b) Donation-based crowdfunding: Funders give money with no expectation of return.
- c) Purchase-based crowdfunding: Funders pre-purchase a product or service (like Kickstarter rewards).
- d) Investment-based crowdfunding: Funders receive a share of profits, equity, or dividends in return for their contribution. This matches Company A's case.

**Q92. Crowdfunding can be classified into loan-based, donation-based, purchase-based, or investment-based types, depending on the differences in the form of funding and the way the compensation is received. In order to start a new business, Company A has decided to raise funds through crowdfunding and pay a part of the profits to the funders as dividends. Which of the following is the most appropriate type of crowdfunding used by Company A?**

- a) Loan-based crowdfunding
- b) Donation-based crowdfunding
- c) Purchase-based crowdfunding
- d) Investment-based crowdfunding

## **Q93. Which of the following is the most appropriate characteristic of BPM (Business Process Management)?**

- a) In order to resolve a business issue, the introduction of a mechanism of management according to international standards is required.
- b) The processes are analyzed, and problems are identified for continuous improvement of the processes.
- c) The efficiency of business processes is promoted by outsourcing some of them to external vendors.
- d) Business processes are fundamentally reviewed and redesigned.

**BPM is a systematic approach to improving an organization's business processes. It involves analyzing, modeling, monitoring, and continuously optimizing workflows to make them more efficient, effective, and adaptable to change.**

- a) In order to resolve a business issue, the introduction of a mechanism of management according to international standards is required.
- b) The processes are analyzed, and problems are identified for continuous improvement of the processes.
- c) The efficiency of business processes is promoted by outsourcing some of them to external vendors.
- d) Business processes are fundamentally reviewed and redesigned.
